

# HIMGIRI ZEE UNIVERSITY NEWSLETTER

QUARTERLY PUBLICATION OF HIMGIRI ZEE UNIVERSITY

Volume 1 | Issue 1 | June 2017

## Congratulatory Note

Dear Reader

It gives me immense pleasure to see that the first "University News Letter" is published. I am sure that the newsletter will provide a platform to students and staff to exhibit their creativity and disseminate information about University, national and international news of academic importance.

In last year University has added many new sports facility and now cemented cricket pitch is ready to be used. National Seminar, Earth day, Women's day celebration, Annual FEST "Expression", Fresher's night, Hostel night, Youth Parliament and Mushaira were events to name few that were hosted by students.

2016-17 was milestone for the University as it has weathered ill motive minds where some of students were also trapped. With mala fide intention they approached to the Hon'ble Supreme Court. But "Satyameva Jayate", truth will always prevail, Hon'ble Supreme Court has dismissed the case in our favour. The mala fide mind is thus cautioned to stop nefarious activity that malign the image of "temple of learning".

Last year has been wonderful for the University graduates, where 70 % of our students were placed through training and placement office. The enrollment in the last academic session has been double compared to academic year 2014-2015. This shows the confidence of students and parents in the University. This also endorses our initiatives taken to improve academic quality and teaching standard.

I am happy to inform that from academic year 2017-18, University has decided to launch B. Vocational programme and Master in Law (LL.M). Himgiri Zee University is probably the first University in Dehradun to start B. Vocational programme.

**Dr. Rakesh Ranjan**  
Pro Vice Chancellor  
Himgiri Zee University

### Thought of the Newsletter

Where the world has not been broken up into fragments  
By narrow domestic walls  
Into that heaven of freedom, my Father, let my country awake  
**Rabindranath Tagore**

### Editorial Board

#### Patrons:

Dr. Ravindra Bhardwaj, Vice Chancellor, Himgiri Zee University  
Dr. Rakesh Ranjan, Pro Vice Chancellor, Himgiri Zee University

#### Editor

Ms. Ankita Uniyal

#### Members

Mr. Sudheer Deoli, Ms. Soniya Chamoli, Mr. Vikas Chauhan, Mr. Rakesh Arya, Mr. Pushpendra Verma, Ar. G. Radhika, Mr. Sanjeev Kumar

## University Aims At Life Long Learning: Dr Bhardwaj

**Dr. Ravindra Bhardwaj**, a pioneer in higher education, Vice Chancellor of Himgiri Zee University is a man with a purpose. He strongly believes that the role of higher education is much more than just providing skills to the students -- it is about providing them with life long learning through which they can be big citizens of the country, the game changers of the next generation.

**Dr. Bhardwaj** spoke to **Ankita Uniyal** about his vision and plans for the students of **Himgiri Zee University**. Edited Excerpts:

**Himgiri Zee University** was established almost a decade ago with the vision to make positive difference to education and employment. Do you think it is on the path of achieving its goals?

Education is all about development of people, not only just the knowledge it is development of their mental faculties, aptitude and attitude. A person who acquires these qualifications while learning in the University becomes good for the society and that is what the role of any University is. It is not just the classroom education, at least I as VC think of the all round development of the student so that he/she becomes a learned person later in life. There are many educated people who are unemployed because they have not learned the art of living. Ultimately the person should be able to see what is good and develop a attitude to be successful in life.

Therefore, this University is on the right path, the students here not only study in the class but are given an opportunity to express and explore themselves in many ways so that their personality changes and they get transformed and that leads to their employment abilities and most of our students get campus placement after their proper training

**As this University comes with the brand name of Zee do you think the benefit of the brand is passed on to the students of the University?**

Zee is not only a national but an international brand including its ZEE TV USA. Zee has been serving the nation for more than three decades this gives the students an opportunity to get trained in Zee organisations which are more than 30 now but primarily they get training in ZEE Media which include ZEE TV, and other Brands. Their basic training helps them to get a job elsewhere also.

**Earlier the governments emphasized a lot on school and primary education but now they have moved their focus more on skill training. How do you think the University is contributing towards that?**

The nation might have this kind of priority to have a kind of people who are skilled but skill is just a set of competence a person acquires to be financially employed. A University is not meant just for providing skill. A University is meant for higher learning and meant for developing creative faculties of the people. I for one believe the student must have basic skill in a particular area but ultimately they all should become creative so as to become successful. Everyone has hidden talents, the person will be more happy to do the job that interest him. Being skilled is just like producing a labourer who can do some job a continuous like a robot. He is not productive totally for the society he maybe productive for the self.

**So do you think that the work of the University is far beyond just providing skill to the students...**

## Mehfil of Gazals, Shayari and Poetry

Marking a tribute to Indian tradition of Ghazal and Shayari Faculty of Mass Communication, Himgiri Zee University organized a Mushaira. The programme started by the lighting of the lamp by Pro Vice Chancellor Dr. Rakesh Ranjan and Registrar Dr. Viplaw Pandey.

On the occasion Dr. Ranjan sited the importance and prominence of Shayari and Ghazal in Indian tradition by mentioning the famous couplets of Shayar like Faiz, Firaq and Mazaaz. He also mentioned his expectation of carrying forward this rich tradition of art.

Dean, Faculty of Architecture, Prof. Satish Kulkarni gave his tribute to famous lyricist Sahir Ludhiyanwi by singing his famous song from movie Gumraah, 'Chalo ek baar fir se ajnabee'.

On the occasion Pragati from Department of Agriculture won the first prize while Navdeep Saini from Mass Communication and Sugam from Forestry department won second and third prize respectively. Head and In-charges from various departments of University were also present on the occasion.

The programme was successful by the tireless efforts of Sudheer Deoli Ankita Uniyal, Vikas Chauhan, Soniya Chamoli, Sanjeev Kumar and Kailash Kandwal.

## World Forestry Day Celebrated in Campus

To create awareness among the youth of the University the Department of forestry celebrated World Forestry Day.

In the day long event several programmes were arranged that included tagging of trees, marathon, skit and ex-

tempore. All the students and staff of the department along with other participated in the event with great enthusiasm.

On the Occassion the Pro Vice Chancellor Dr Rakesh Ranjan said, " such events are essential to preserve the forests and to make the world a better place to live in."

## Women's Day Entho Amongst Students & Staff

To celebrate the idea of being a women this year Himgiri ZEE University Came up with the idea of having a speech competition

for the students of the University the theme for which was " Be Bold for Change". At the event Ar. G. Radhika was also facilitated by the University as the Women Achiever for the University for bagging the Young Scientist Award recently in a Conference held by UCOST.

## Students At University Celebrate Expression 2017

"Expression 2017" was celebrated in Himgiri Zee University with great zeal and enthusiasm. The main attraction of the evening was Voice India fame contestant Abhimanyu Ganguly's performance. On the occasion Vice Chancellor Dr. Ravindra Bhardwaj encouraged students to be part of cultural activities so that the ethos of India can be elevated to the international platform. The Pro Vice Chancellor of the University Dr. Rakesh Ranjan appreciated the efforts of students in organizing the event successfully.

Fashion show was held on the occasion in which Tamseel Ahmed and Sugam won the title Mr and Miss Expression 2017. Winners of song, dance, nukkad natak, poster making competition etc. were also felicitated. It was a delight to students taking forward the culture and traditions of our country. The event was successful due to the efforts of various committees which were represented by Ms Ankita Uniyal, Mr Kailash Kandwal, Rakesh Arya, Dr Anoj Raj and Dr Sharad Pandey.

## First Ever Youth Parliament at HZU

To give its students a feel of working of a democracy HZU conducted Youth Parliament. The special guest on the occasion was Mr Deepak Upadhayay, Senior Media personality.

In keeping up the academic traditions of the institution the programme started with the welcome of the guests that included the V.C. Dr. Ravindra

Bhardwaj, Pro V.C. Dr. Rakesh Ranjan, the Registrar Dr. Viplaw Pandey and CFO Mr. Anterdeep along with the members of University. More than twenty students from different disciplines of the University participated in the youth Parliament.

They picked up sensitive issues, these included topics such as women freedom, safety and protection in India etc. The students in opposition also questioned the defence spending of Indian government while also discussing other key issues that are troubling the country today.

## Ar. G Radhika Awarded -- Young Scientist Award

At a UCOST Conference held in Dehradun recently Ar. G. Radhika Associate Professor at the Department of Architecture of Himgiri ZEE University was awarded with the young Scientist Award.

For presenting the research work on title Rural technology and the topic is " Bamboo as an alternative building material, need to change its under usage to over usage of houses and other buildings". Her achievement was applauded by the V.C. Dr Ravindra Bhardwaj during the Women's Day Celebration where he recognised the contribution of women to the society and in academics particularly.

Cont ....

Definitely a University's job is to create people or not create people but see to it that the persons creative abilities come out and they are at its forefront. God has gifted everybody with lots of talent only thing is to utilize your talent.

If I train him to be an AC mechanic he will keep on making ACs, his job will be monotonous. Offcourse from the nations point of view it is important that the person should be gainfully employed but the University has a bigger vision a broader vision.

**As we are seeing that there is new trend -- a lot of Private Universities are coming up in India so do you think that due to this competition they are increasing the competencies of our educators?**

I got my education from the premier University of the nation therefore I possess very different views of many issues. There is no competition for IITs irrespective of number of Universities that have doubled in the last 10 years from 350 Government Universities now there 700 Universities the growth has been haphazard and unsystematic. There have also been fly by night operators who have cheated the students the nation, and have not done good to the students, the nation has not yet developed into service sector.

**So do you think the competency has increased?**

The competence has increased certainly the students who were not able to get into IITs, NITs and AIIMs or government institutions etc. now have an opportunity to study and broaden their horizon but these Universities need to be controlled and they need to understand that they owe their responsibility toward

the students. They have to realize that they are not here for business.

**So how do you propose to make HZU a world class University?**

See the word world class is a misnomer even the institutions like IIT's in India are famous for B.Tech but not for MTech and Ph.Ds. Any world class University's first criteria is that they should be research based and innovation driven, it should lead to creation and development of knowledge as knowledge is the basis of the society.

And that will not happen on itself it requires multitudes of inputs and the first is infrastructure and on top of that man power which can contribute to research and development.

**But every University has an aim it has goals that this is where it has to reach?**

I want this to be in a place where the students can learn and get an employment but at the same time become creative thinkers of their own. I want them to grow as big citizens of the world people who can bring sea changes. I do not just provide them with managerial skills or some skill but want to develop students who can be big citizens of the country. And big citizens is someone who can bring sea changes in the country that kind of people who can be entrepreneur so we give opportunity to the student to express and excel in different areas and that has been my motto.

**Any message to the students**

Do good to yourself the University will take care itself, take care of your responsibility the University will take care of its responsibility.

## Bamboo As An Alternative Building Material

Ar. G. Radhika

Bamboo, a common grass which can be harder to pull apart than steel, it has the potential to revolutionize building construction throughout the world. As a raw material Bamboo is found predominantly in India and stands as a second largest producer in South Asia next to China.

At present Steel-reinforced concrete is the most common building material in the world and developing countries use close to 90% of the world's cement and 80% of its steel. However, very few of these nations have the ability or resources to produce their own steel or cement, forcing them into an exploitative import relationship with the developed world. But Bamboo provides a material alternative, without a pre-existing industrial infrastructure built to skew things towards the rich world; bamboo has the potential to completely shift international economic relations. Since bamboo grows widely in the tropics, it is extremely hard to pull apart than timber or even reinforced steel. Thus, it is slowly started adopted as engineering material for construction of houses and other buildings.

For few centuries, bamboo usage is generally limited to being a structural component in regions where it reflects local architectural traditions, the attempts of its usage were as part of fencing, temporary shelters, craft products, furniture, scaffolding and ladder in the under construction site etc. Later on new construction techniques were invented for seasoning and upgraded joinery techniques, where it could be widely used in construction technology. At present bamboo fiber

could be extracted and combined with other materials to create a composite, harnessing its natural strength as part of a viable building material, an alternative to steel and timber. In India, BMTPC[Building materials and Technology Promotion Council, New Delhi, ITIRTI, Karnataka, Auroville Bamboo Research Centre and the Auroville Earth Institute, Pondichery are working on research for using bamboo as a building material with new construction technique and improving the utilization of bamboo material in a better way.

The Bamboo composite material can be produced in any of the familiar shapes and forms in which steel and timber are produced. Like them, the material can be used to build wall structures for houses or any other buildings.

Bamboo being highly renewable, eco-friendly and grows faster than wood captures carbon and plays an important role in reducing carbon emissions in India. The commercialization of bamboo mat corrugated sheet technology will generate livelihood for nearly 7000 women/men through mat weaving in rural regions. The use of rural technology with basic improvement in the use of bamboo as a building materials helps in making simple and economical housing solutions.

This paper will showcase the various possibilities of bamboo as a building material from under used conditions to overused conditions by discussing it through relevant examples. It concludes with meaningful recommendations for sustainable future in the use of bamboo as a building material.

## Mobile Phone Explosive Detection System

Pushendra R Verma

Now a days, terrorism and suicide bombers are the major threats faced by mankind. This may lead to loss of lives, injuries as well as damages to the properties. The reason behind such kinds of unlawful activities is that these groups of terrorists already know the weakness in the security system and thus they easily bypass the security system.

Besides, many countries are still using traditional security system which is bulkier. In this paper, a portable, highly suitable and effective solution is proposed. The proposed concept is known as mobile phone explosive detection system in which CVS is used in order to detect the explosive vapors from the surroundings and also mobile phone explosive vapor detection algorithm is proposed to detect the presence of explosive vapors.

The aim is to create a system which can be used by a common person easily and also helps in maintaining peace in the country. The finest part of the system is that it does not require extra power supply for the system, as it uses the mobile battery power. This concept may help in isolating the suicides bombers and thus plays a very crucial and important role in forensic investigation by detecting the explosive vapors.

## Essential Web Factors Of E-Commerce

Manju Verma

E-commerce or electronic commerce is the conducting of business activities online, including shopping, banking, investing, and other business transaction, or uses electronic data interchange, also called Internet commerce, or i-Commerce. Basically e-commerce is the buying and selling of goods and services on the internet and on different online networks especially World Wide Web. The development of e-commerce has led to companies moving much of their business efforts to online environments.

Dot com craze has stimulated a global commercial environment which is now being exploited by many firms who are engaged in e-commerce. This research paper describes the invention and accessibility of internet connectivity and powerful online tools has resulted a new commerce era that is e-commerce, which has completely revolutionized the conventional concept of business.

## Hand Written Signature Verification

Rohit Goyal

Signature continue to be an important biometric for authenticating the identity of human beings. This paper presents an effective method to perform Off-line signature verification using unique structural features extracted from the signature's contour.

A novel combination of Modified Direction Feature (MDF) and additional distinguishing features such as the centroid, baseline area, length and skew are used for classification. This project involves the design and development of an efficient signature identification system. The pattern recognition algorithm designed for this project is based on general architecture of signature identification system. Program source code and simulation is executed in MATLAB.

## Science Day Celebration

On the occasion of the Science Day, Department of Engineering and I.T organized a Science exhibition at the premises of Himgiri Zee University. Where in the pupils of different streams displayed their working models. In addition to that science quiz and poster making competition were held, in which the pupils of Engineering and Architecture majors secured the first position.

The celebration of Science day started with the blood donation camp. Honourable Vice Chancellor, Prof. Ravindra Bhardwaj; Pro. Vice Chancellor, Prof. Rakesh Rajan; and Registrar, Dr. Viplaw Pandey begun this good cause. The students showed great enthusiasm towards the blood donation camp and other activities held on the day.

On the successful promotion of the day Prof. Rakesh Rajan, Pro Vice Chancellor, applauded the students for their remarkable efforts and encouraged them for making it more wonderful in the coming future.

## Quiz Mania

The department of Management and Commerce organized QUIZ MANIA. The objective of the quiz mania was to inculcate in students the curiosity to search for relevant information. It was also to encourage the students to participate and be competitive at the same time. The students were motivated to learn and get information in a light and fun atmosphere.

All the students of the department participated in the event with zeal. There were three rounds of competition. Questions from all walks of business environment were asked. They were in written, oral, audio and visual format.

The winners for the event were Pooja Thakur of BBA semester VI and Rohit Singh of BBA semester II. Individual trophy and certificate were given to the winners, and a certificate of participation was provided to other participants.

## Himgiri Student: Mr. Madhya Pradesh

Mr. and Ms. Madhya Pradesh Contest was organised by the SIT XprssN in Bhopal. Student from B.Sc Forestry III year batch, Mohammed Tamseel Ahmed participated in the pageant! After being in the top 5 and question-answer round, he won the competition, and became 10th Mr. Madhya Pradesh. Director Zia Ullah Khan signed him for his next project. After his graduation he has plans to prepare for Mr.India competition.

## B.Ed Students Intern at District Schools

The Students of B.Ed IVth semester have completed Internship Program in different schools after getting permission from the Principals and District Education Officer.

## Hotel Management Students Visit Jaipur

Without practical exposure, knowledge cannot be effectively imparted to others. With this belief department of Hotel & Tourism Management conducted Industrial Visit for students to Jaipur. In this tour, students got a chance to observe and learn the actual working of a fully fledged hospitality industry. Industrial visit are not only good for the students but the teachers also get a chance to update themselves with the current trends in the hospitality industry.

## B.Sc Agriculture Students Visit FRI

Understanding the importance of hands on experience and field visit the Faculty of Agriculture took the initiative to conduct a study tour for the students of the department to Forest Research Institute which is a world renowned institute of India

## Buddhist Architecture Site Study

The Department of Architecture conducted for its students site study of spritual centre at Clement Town. Herein they learned principles of Visual Architecture, its functional aspects etc. The tour was conducted under the guidance of professors from the department.

## Waste Water Management In Haridwar Hotels

Ashish Dhyani

Depletion of water at an alarming rate and ever increasing demand of water has created a serious challenge before us towards its sustainable management. As we know, it is an important natural resource playing a vital role in our daily life. It is used extensively in the hospitality industry for various purposes like food processing, sanitary, dish washing, laundry, horticultural activities etc. This one time used water is wasted and sometimes dumped in unsustainable manner. It has been observed, that untreated waste water has adverse effects on environment and on human life on one side while on another side creating scarcity of water, so its treatment is of utmost importance parallel with reduction, recycle and reuse of water.

Most of the hotel management companies have started to induce their social and environmental responsibilities by taking a step ahead and

## Role Of Community Radio In Uttarakhand

Vikas Chauhan

The basic tenet behind the start of several community radio stations world over is the development of local communities through participation of their own people. The concept of community radio in Sri Lanka and Radio Enriquillo in the Dominican Republic emphasizes on self – management by local communities . In India, there are around 179 community radio stations operating at present. Their contribution in the process of development of local communities remains to be known.

Traditionally, mass media institutions world over are either privately owned or operate under autonomous bodies established and funded by the state. The use of these institutions as a means of communication to accelerate the process of development specifically in developing economies has been long debated. However, in Mass Media and national development, Wilbur Schramm (discussed that older model of development resorted to the top down approach where along with political and economic centres of power; media too followed it.

The flow of information generated by mass media is generally vertical i.e. from centre to local people, from literates to illiterates, from those who possess receivers to those who do not. He also states that media are not very good at two way communication or horizontal communication.

Therefore, the new order which emphasizes on local strategy for development downplays the vertical communication function of media and rather stresses on media to support the horizontal communication, interpersonal communication, local organisations and local media.

Community radio is an initiative which fits into what Schramm suggests local strategy for development. It promotes local decision making, participation and horizontal communication.

Sarvaes while discussing the concept of ‘another development’ in ‘Communication for development and social change’ suggests that each society relies primarily on its strengths and resources in terms of its member’s energies and natural and cultural environments. It indicates that the efforts of development have to come from within rather than outside. In this regard, community radio sta-

equipping their properties with sustainable water treatment plants. So, that the treated water can be used for non-potable purposes like horticulture, laundry, car wash etc. Recycling wastewater therefore, makes it a resource rather than a waste, yielding both economic and environmental benefits.

This research paper is an exploratory study of hotels of repute, situated in Haridwar, Uttarakhand, as a case study with the objective that how untreated waste water can put the hotel under legal trouble. In 2015, a renowned hotel was allegedly found violating pollution norms as laid down by the National Green Tribunal (NGT) and was sealed by a team of SPCB- State Pollution Control Board (Economic Times, May 24, 2015). In this study, I have explored the various ways for reducing, recycling and reuse of waste water in hospitality industry.

tions can play a significant role in sensitizing the communities, making them part of the process as agents of social change. Mahaweli community radio in Sri Lanka and Radio Enriquillo in the Dominican Republic emphasizes on self – management by local communities . In India, there are around 179 community radio stations operating at present. Their contribution in the process of development of local communities remains to be known.

In India the campaign to legitimise Community Radio began in the mid 1990s, soon after the Supreme Court of India ruled in its judgement of February 1995 that “airways are public property.” In February 1995, supreme court of India ruled that ‘airways are public property’.

In 2006 it was promised by the Government that 4000 community radio stations will be opened up soon in India. In 2008, there were 38 community radio stations out which 36 were owned by educational institutions and rest of the two by NGOs. Now, if there are only around 179 community radio stations at present as compared to what was promised then it certainly raises a question mark over the role of Government and their seriousness about the issue.

In an article written by Suresh Ediga in 2015 on a website ‘factly.in’ it was mentioned that UNESCO believes that Community Radio has the potential to democratize communication & broadcasting. But despite the potential, Government procedure & control remains the biggest bottleneck for the growth of Community Radio in India. A mere 11% of the applications for Community Radio were accepted since 2012 by the Government.

There are critical media reports available about the ownership and operations of community radio stations. However, their strengths and weaknesses, the role and attitude of Government towards the establishment of community radio stations still needs to be investigated at length. There is no question mark over the potential of community radio, it is only about how we can best use our resources and contribute in the process of overall development.

## Mass Comm Students Stage play at Town Hall

Students of Mass Communication Department participated in a play in Town Hall Dehradun. Mr. Kailash Kandwal, Assistant Professor along with students Abhishek Nautiyal and Navdeep Saini were a part of the play titled Kawua Chala Hans Ki Chaal. The play was directed by Mr. Kailash Kandwal who also encouraged the students to participate in the play and has formed the Himgiri Drama Society.

The play was enacted amongst a gathering of more than a 500 people and was a great success.

### Thought Process

बिछड़ना तय है।  
तय नहीं की कब  
पर उतना ही निश्चित  
जितना दिन के बाद रात का होना।  
मेरी तैयारी भी पूरी है  
कैसे तुम्हें थोड़ा सा अपने साथ रखना है,  
सब को भरमाते हुए कि तुम अब नहीं हो  
तुम्हें ऐसे ही रखुंगी जैसे हिन्दी बोलते हुए,  
चुपके से लगा देती हूँ बल  
गढ़वाली साथ रखते हुए  
कोई समझे इस से पहले ही बात खत्म कर देती हूँ।  
जैसे जीरे मैं मिलाकर रखती हूँ थोड़ा सा जख्मा,  
सिर्फ मैं जान पाती हूँ स्वाद मैं आ जाने वाला फर्क।  
जैसे बेटी के तमाम खेलों में,  
चुपके से शामिल कर लेती हूँ, घुघुती बासुती  
जी लेती हूँ अपना बचपन।  
या फिर जैसे उगाती हूँ  
क्यारियों में थोड़ी सी कंडाली  
बिछड़ना तय है।  
और उतना ही ये भी तय है कि तुम साथ चलोगे।

### दीपिका घिल्डियाल, एडमिशन काउंसलर

#### मेरा माजी मेरा बचपन

ऐ माजी मेरे क्या तू कभी लौट आएगा  
फिर बैठ मेरे संग यूँ ही मुस्कुराएगा

बचपन की सारी बातें उन्ही दोस्तों के संग  
क्या पहले जैसा तू भी कभी गुनगुनाएगा

न जाने मेरे दोस्त, वो अपने कहां गए,  
क्या दूँदकर उनको भी कभी लेकर आएगा

वो बेतहाशा खेलना और डांट भी खाना  
लम्हों के सभै किस्से कभी तू सुनाएगा

उंगली पकड़ के भैया के स्कूल को जाना,  
ऐ माजी मेरे दिन वो कभी तू दिखाएगा

आते ही, मेरे पापा के झट गोद मैं चढ़ना  
पापा को मेरे फिर से कहीं से बुलाएगा

आंचल से मेरे आंसुओं को पोंछती थी मैं  
दामन मैं मेरी माँ के मुझे फिर रूलाएगा

1 माजी = past  
खालिद, विभागाध्यक्ष प्रबंधन विभाग

#### लक्ष्मण रेखा

त्रेता में जाकर  
कहना है लक्ष्मण से  
तुम्हारी खींची रेखा  
आज भी जीवित है।  
उसका जीवन अनंत है  
वो खिंचती चली आ रही है  
सदियों से।  
लेकिन जब भी उसे देखा है  
अपनी धूरी में पाया है।  
वो जीवित है।  
सांस लेती है  
मेरे साथ

कभी माथे की भरी मांग की तरह  
तो कभी सूनी कोख की तरह।  
कभी

भरी मांग के सूने होने पर  
और सूनी कोख के भरे होने पर

भ्रूण पूछती है।  
लक्ष्मण ... तुम्हारी रेखा  
मुझे डराती है,  
कहती है,

मुझे मत लांचना।  
उस पार दस सिरों का रावण खड़ा है।

मैं रावण को खड़ा देखती हूँ,  
और फिर एक सवाल कौंध जाता है  
लक्ष्मण ...

क्यों नहीं खींची ये रेखा तुमने  
रावण की धूरी में

प्रियंका, आर जे,
