9)Dr. Bharat Ankur Dogra

10)Mr. Dipti Prakash Sahu

11)Dr. Pankaj Kumar

12)Dr. Rajesh Ramasamy

(57) Abstract :

The current research work aims to assess the socio-economic and environmental impacts of tourism development. To gather the first information about current and potential impacts in and around Dehradun, 250 locals were surveyed using questionnaires structured with informal discussions with key tourism partners at various tourist sites. Respondents' opinion was obtained on the basis of a five-point literal criterion of 1 to 5 'strongly disagree' and 3 strongly 'disagree' or 'disagree'; And the sequence was changed to negative statements such as a given 'strongly disagree' value of 5. The questionnaire is divided into the following six sections: Population Information, Socio-Cultural Impact, Environmental Impact, Economic Impact, Public/ Physical Impact and Approach Tourism Development. After collecting primary information through self-management studies, the data were processed and filled into SPSS version 20 for analysis.
